Continuation Sheet (PTO-303) - 909/494,327

(

Continuation of 2. NOTE: The applicants proposed to amend the claims to recite a pumping system having a turbomolecular pump and a roughing pump coupled in parallel. This limitation was not previously presented and considered.

Continuation of 5. does NOT place the application in condition for allowance because: the applicants rely on the proposed limitations, which would not be entered. It is also noted that the applicants argue the limitations which are not in the claims. Specifically the limitation of opening the isolation valve between the roughing pump and the turbomolecular pump during the cleaning step is not in the claims.
